

Professional biography

Dr. Sidi Mohammed El Amine BEKKOUCHE is a permanent researcher at the Applied Research Unit in Renewable Energies "URAER" in Ghardaïa, EPST CDER - Bouzaréah Algiers, since 2005. He obtained a bachelor's degree in exact sciences in 1996, and a diploma of higher studies in physics in 2001 at Tlemcen University, in 2004 obtained a Magister's degree in electronic physics and modeling from Abu Bekr Belkaïd University - Tlemcen. His doctorate of electronic physics and modeling awarded in June 2008 was focusing on the experimentation and the modeling of some solar energy systems. He obtained his degree as research director in March 2016. He carried out his research work on renewable energies, in particular solar thermal and building physics. He headed a research division for 9 years. He has directed and supervised more than 9 doctoral theses and contributed to 81 research publications in different national and international journals and about 55 research communications.
